

Industry Background

I am seeking a career change into Content Creation, Photography/Digital Media where I am looking to further develop my skills. I believe my determination and drive for the Industry, along with my integrity will be of value to myself and a reputable company.

I have obtained the Record of School Achievement (RoSA 2012) with highest levels of Literacy and Numeracy, and completed my TAFE Trade for Plumbing, Drainage, Gas fitting. While working within the plumbing industry, it has given me a kick start on operating machinery which I have then gone onto working within the Civil Industry.

Since 2016, I have been a lead Civil Works operator on a full-time basis. I am currently employed by Austeire Plant Hire & JC Excavations Australia Pty Ltd as a Plant Operator. This role entails leading crews and completing major/minor works on Tier One projects, while meeting strict deadlines and reporting to Site Foremans and Project Managers.

Professional Experience

I have worked on major Sydney Government and Commercial projects such as; Sydney Light Rail, NRT Project, WestConnex M4/M5, and Sydney Water projects.
