

SENIOR INTERIOR DESIGNER

PROFILE

I am a Senior Interior Designer with a background in Technical Architecture from the Polytechnic University of Barcelona, holding a Diploma in Interior Design from Sydney Design School. With experience in residential, high-end residential, and hospitality projects across Australia.

Originally from the Basque Country, Spain and after living one year in Mexico City, I relocated to Australia seven years ago and have since become a permanent resident. This journey has infused my designs with a unique global perspective, influenced by my experiences in diverse cultures and countries.

To me, design is more than aesthetics; it's about crafting spaces with intention and function, spaces that resonate with and inspire their users, enduring the test of time. My approach is characterised by a natural eye for detail, strong work ethics, and a genuine desire to achieve extraordinary outcomes for both clients and the companies I've worked for. I am fuelled by a deep commitment to making a meaningful impact through thoughtful design.

Ideally, seeking a remote position, I am enthusiastic about contributing my expertise to a dynamic team that values purpose, innovation, and creativity. I look forward to both contributing to and learning from my peers and experiences, fostering a continuous journey of professional development.
